

Signing Agent HQ

The complete notary business & tax system

Quick-Start Guide

Track every signing. Capture every deductible mile. Walk into tax season ready — in one system.

Single-user license. This is an organizer, not legal or tax advice — confirm all figures with a professional.

1 · Set up in 3 minutes

- **Make your copy.** Google Sheets: File → Make a copy. Excel: save your own copy.
- **Set the mileage rate.** Open the **Settings** tab and enter this year's IRS standard mileage rate. Every deduction flows from this one cell.
- **Add your name & business** in Settings — it auto-fills your invoices.
- **Add your title/escrow companies** in the **Companies** tab so they appear in the Signing Log dropdown.

2 · Log every signing

In the **Signing Log**, add one row per appointment. Pick the company, appointment type and status from the dropdowns, enter the fee and round-trip miles — and **Net profit calculates itself** (fee – mileage – printing – other).

- Set **Status** to *Invoiced* when docs go back, then *Paid* when the money lands.
- The row highlights yellow while unpaid and green once paid — chase the yellow ones.

3 · Capture miles & expenses

The **Mileage Log** turns miles into a dollar deduction automatically. Log drives the day you make them — the IRS wants a timely, accurate record.

- **Expenses** tab: log supplies, E&O insurance, training, phone, NNA dues, software, printing, marketing.
- Pick a category from the dropdown so it lands in the right tax line.

4 · Watch the Dashboard

The **Dashboard** shows fees paid, outstanding cash, net profit, miles, mileage deduction and progress to your income goal — plus charts of profit by appointment type and paid vs outstanding.

5 · Get tax-ready in one click

The **Tax Summary** tab aggregates everything and maps it to **Schedule C** line items. At tax time, hand this single page to your accountant.

- Gross income, mileage deduction, supplies, insurance, training, software, dues and more — totalled for you.
- It even estimates your net profit. (Organizer, not tax advice — verify with a pro.)

6 · Send a professional invoice

The **Invoice** tab pulls your business name, fills line items and totals automatically. Fill the gold cells, print to PDF, send.

New agent? Use the First 90 Days Launch Checklist (in the bundle) to go from commission to your first 10 signings.

Pro tips

- **Fire your slow payers.** Sort Companies by Pay speed and Rating — give your best slots to who pays most, fastest.
- **Update the IRS rate every January** in Settings. One cell updates the whole system.
- **Reconcile weekly.** Five minutes every Friday beats a frantic April.
- **Back up.** Keep your master copy clean; duplicate it each tax year.

Thank you

You bought this to make money on your terms — not to drown in spreadsheets. Now the admin runs itself. Go take more signings.
